▤ Project Finalizing

We used second week to decide on the our project

Task tags: *No tags*

> ✳ Finalized our project   Created by Shirshak Aryal on 23.09.2016 16:22.

All of our group members have a connection with Nepal. Thus, we have decided to focus on an

issue pertinent to the rural Nepali population where hand burns due to cooking fires are common.

These victims undergo surgery but cannot afford the physiotherapy necessary post-surgery. The

lack of therapy can lead to scar tissue formation and contraction, leaving the burn victims unable

to use their hands for their daily activities. Our group is focused on designing an orthotic splint

that can act as a rehabilitating device for these burn patients, post-surgery. Utsav has worked on

a previous project similar to this with the same sponsors. Our goal during this attempt will be to

completely rethink and redesign the splint from the ground up. We want to focus on creating a

device is simple to use and affordable for the community while being effective in rehabilitation.

We will discuss with our sponsors to ensure that our design meets the necessary criteria and will

be able to achieve its desired goal.

Completed by Shirshak Aryal on 23.09.2016 16:28.

❯ **Step 3:** Email Conformation

We finally got email confirmation this week from our client stating that she will guide us through our project.

Completed by Shirshak Aryal on 23.09.2016 16:27.

❯ **Step 2:** Waiting on clients reply

We waited on our clients reply, but Utsav managed to get verbal confirmation, thus we mentioned her as our client in our project scope report.

Completed by Shirshak Aryal on 23.09.2016 16:26.

❯ **Step 1:** Emailing the client

We emailed our prospective client Kimberly Souza, a medical student at Stanford, who is a co-founder of the start-up "Hand Hero."

✳ FInalized our client   Created by Shirshak Aryal on 23.09.2016 16:33.

We were finally able to get into contact with our client, the start-up "Hand Hero." Our contact

person will be Kimberly Souza, a medical student at Stanford and a co-founder of Hand Hero.

They have agreed to support us throughout this project and aid us as needed through the design

and development phases.

▭ Adding Group Members

No due date

No description

Task tags: *No tags*

Completed by Shirshak Aryal on 23.09.2016 16:15.

➲ **Step 1:** Adding all the members

Since we had problems with SciNote, we had to dedicate first week to make sure all three of us were active on SciNote.

💬 Comments for step Adding all the members

No comments

✳ Successfully added the group members.
Created by Shirshak Aryal on 23.09.2016 16:16.

Although,it took us a while, we were have to get everyone on sciNote. So, this task is completed.

▭ Group Meeting

No description

Task tags: *No tags*

Completed by Shirshak Aryal on 23.09.2016 16:40.

➲ **Step 1:** Group met on Wednesday, September 21

We met at 6 pm in the BME library, Whitaker Hall. Our primary objectives were to come up with a weekly meeting time, and discuss planning and project design steps.

💬 Comments for step Group met on Wednesday, September 21

No comments

✳ Finalized meeting time and logistics   Created by Shirshak Aryal on 23.09.2016 16:43.

1) We finalized that Wednesday 6-7 pm will be our primary meeting time. 2) We also identified an alternate meeting time (if primary doesn't work for certain weeks): Sundays at 7. 3) We discussed about few logistics, but were not able to get to design and process part yet.
