## 📅 Group Meeting 02/12/2017

*No due date*

*No description*

Task tags: *No tags*

Completed by Utsav Malla on 17.02.2017 17:05.

---

### ➡ **Step 1:** Group Meeting

In this meeting , I met with Shirshak and Nischal to finalize our exoskeleton drawings that we want to model. I came up with a few hand sketches and discussed the viability of the design with the team. We have come to the conclusion that the design sketches are workable. With the completion of the hand drawing procedure, we are now moving forward to creating an actual CAD model of our exoskeleton.

Task created on 17.02.2017 16:54.

## 📅 Group Meeting 02/15/2017

*No due date*

*No description*

Task tags: *No tags*

Completed by Utsav Malla on 17.02.2017 17:06.

---

### ➡ **Step 1:** Google Hangout Session

We had a google hang out session. Since Nischal is the most proficient among us in CAD, we designated Nishcal with the CAD drawing assignment. In the mean while Shirhak and I are going to be working on the elastic glove material and design. We are exploring what kind of textile material tech shop will allow us to work with and based on that we can finalize our material for the elastic gloving material. The deadline we have set for completing the CAD drawing and finalizing the textile material is by the end of next week.
